Step 1

Download P-SECURITY from **dataZenEngineering.com** to a flash drive.

P-SECURITY Installer — 146MB

Step 2

Insert flash drive into USB port on front of OSP control
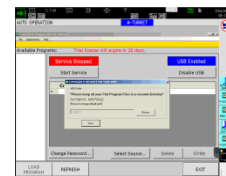

STOP

- ☐ **THINC API Version 1.15.0.0 or above must be installed and running**
- ☐ **API icon in screen tray on OSP control must be green before continuing**

Step 3

- **Launch** Windows Explorer
- **Navigate** to P-SECURITY on USB disk drive
- **Click** "P-SECURITY Setup" compressed folder
- **Click** "P-SECURITY Setup" folder
- **Click** "Setup.exe" to begin the install
- **Click** "Install" for any required items shown on Installation Wizard screen
- **Continue** to follow the installation screen directions to complete the install
  (Note: Installation can take several minutes)
- **Click** "Finish" upon completion of installation
- **Recycle** OSP control by pressing the RED button to shut down and then WHITE button to restart
- **Launch** P-SECURITY using the quick start icon on the OSP control toolbar after API icon is **green**
