# P-SECURITY

Simply scan a barcode to speed up part program loading and reduce keystroke errors.

dataZen Engineering's P-SECURITY provides an Okuma P100 II, P200 or P300 control user with the ability to have the associated Part Program automatically retrieved from local or network location, p-selected into the control ready to run, and call an associated setup instruction file.

dataZen Engineering

5W Hargett St, Suite 200,
Raleigh, NC 27601, USA
sales@dataZenEngineering.com

Benefits

The P-SECURITY interfaces with an Okuma OSP 100II, P200 or P300 controls and enables the user to:

- Automatically download the associated part program from local or network location, saving operator task time
- Program-select the .MIN file into the control, ready to run, with maximum efficiency
- Call an associated setup instruction file on-the-fly

Features

- Scan bar code to load a part program from MD1 folder
- Can load the part program with a click of the button
- Rapid deployment
- *Also ask about P-SECURITY - CNC Programme Edit Lock*

Technical Specifications

- THINC API v 1.15 or greater
- .NET Framework 4.0 SP1
- OSP Controls (P100II / P-200 / P-300)
